

Envision Strategy, LLC is a government affairs and procurement solutions provider for industry and non-profits at the federal, state and local levels of government.

Envision Strategy (Envision) is a government relations and strategic consulting firm dedicated to achieving success for our clients. Envision's approach is more expansive than traditional government affairs. Our team sees the interrelationship between government and business while recognizing that for many clients, public opinion or project funding victories can be as, if not more, important as efforts in the legislative arena. Coupling deep bipartisan relationships with solid policy arguments, our principals have successfully worked to:

- Support passage of key legislation at the state and federal levels of government
- Provide regulatory counsel and solutions for industry, non-profits, and associations
- Execute winning New York State and Federal grants consulting and writing engagements
- Secure public sector procurement success for global companies and innovative small businesses

Envision's principals are hands-on. We believe direct involvement is the most effective way to represent the needs of our clients, develop comprehensive strategies and execute them effectively. Our firm prides itself on constant communication, transparency, and accountability and each of our principal's expertise is leveraged for every client. We intentionally have no junior staff, and our clients enjoy the full force of our senior level capabilities to solve their challenges.

Envision services an exclusive list of clients who reflect our firm's roots and can integrate with our network of political contacts. We strive to never encumber our relationships at any level of government, making certain conflicts do not arise. Unlike other firms that may take the "we can do anything" approach, our team focuses on our core areas of expertise and influential relationships to deliver value to our clients. We always strive to be direct with our clients on their best chance of success, the magnitude of the victory, and what makes the most business sense for their organization.

Our team of talented professionals is comprised of former New York State, Congressional and Executive Branch staff, including former county and federal elected officials who are focused on tangible results and successful outcomes. Providing legislative strategy, directly working through relationships with Federal and State agencies, few are positioned to be so impactful for clients. Our team has a tremendous breadth of experience in crafting and driving policy in multiple practice areas including:

- Healthcare
- Transportation and Infrastructure
- Local and County Government
- Information Technology
- Federal and State Procurement
- Non-Profits
- Organized Labor
- Higher Education

In closing, our team strength and creatively executed solutions are the basis of our firm's practice. Outside of our clients' success, our goal is to continue to grow our practice selectively, never overburdening our extensive resources and consistently delivering legislative, regulatory and economic victories for our clients.
