

CareFindr®

CareFindr® is a unique, stand-alone, cloud-based software product, proprietary to The Bonadio Group that will streamline and automate LDSS's processes to communicate and track critical vendor information and foster care children's placements and movements. This revolutionary solution will centralize relevant data in one platform to enable on-demand viewing and reporting capabilities that will eliminate process redundancies, vendor overpayments and maximize eligible state and federal reimbursement dollars.

Big firm capability. Small firm personality.

THE BONADIO GROUP
Accounting, Consulting & More

1. User Access Roles

From read-only to super admin, four unique access roles allow you to set and edit user permissions based on your staffs' roles in identifying available foster homes, initiating placements and movements, assessing children's LODs and issuing vendor payments.

2. Centralized Data

Eliminate Excel spreadsheets, emails, process redundancies and tedious manual reconciliations to account for children's movements and foster home availability. All staff that play a role in maintaining the county's foster care population and critical vendor information will have access to up-to-date and robust data in one secure, central platform.

3. Workflows

CareFindr is configured to automate and track children's movements and associated costs based on pre-populated vendor availability and program rates.

4. Reports

Generate, export, sort, and share data via through CareFindr's robust reporting platform to isolate areas most vulnerable to vendor overpayments. These reports enable users to compare costs per vendor, case, or child to prevent overpayments, identify inaccurate Title IV-E foster care WMS coding and isolate children with special and exceptional per diem rates to facilitate timely reassessments.

5. Auto-Generated Notifications and Emails

CareFindr is configured to auto-generate letters to notify parents/guardians each time a child moves and when a child has been in foster care 15 out of the most recent 22 months. Children placed in OCFS QRTP accredited facilities will be flagged and will trigger auto-generate email notifications to internal and external personnel to notify them of time-sensitive QI and LSR action items.

Big firm capability. Small firm personality.
